

**KLEENGUARD™**

## **G80 Nitriflex Chemical Gloves**

KLEENGUARD® G80 Nitriflex chemical-resistant gloves provide hand protection when it is necessary to come into contact with low-concentration chemicals, in tasks related to the cleaning and handling of food.

The green nitrile coating provides a barrier that minimizes the penetration and permeation of chemical substances, providing for the protection the user needs. Thanks to its 11 mil (0.28 mm) thickness and 13" (33 cm) nominal length, the glove offers better tactile sensitivity and greater control over the elements with which it is in contact; offering greater dexterity and productivity to the user.

In addition, compared to other similar gloves on the market; G80 Nitriflex has the advantage of having a diamond texture on the tip of the fingers and on the palm to provide a better dry and wet grip that directly impacts one's productivity, as well as being smooth in the other areas to avoid the accumulation of substances that can degrade them over time. It has an anatomical design that easily adapts to the hands of any user.

KleenGuard™ Hand Protection is designed with human-centric engineering that enables rather than inhibits – allowing for maximum productivity and safety.

**KleenGuard™ Hand Protection – Perform with Distinction.**

# G80

## NITRIFLEX CHEMICAL GLOVES

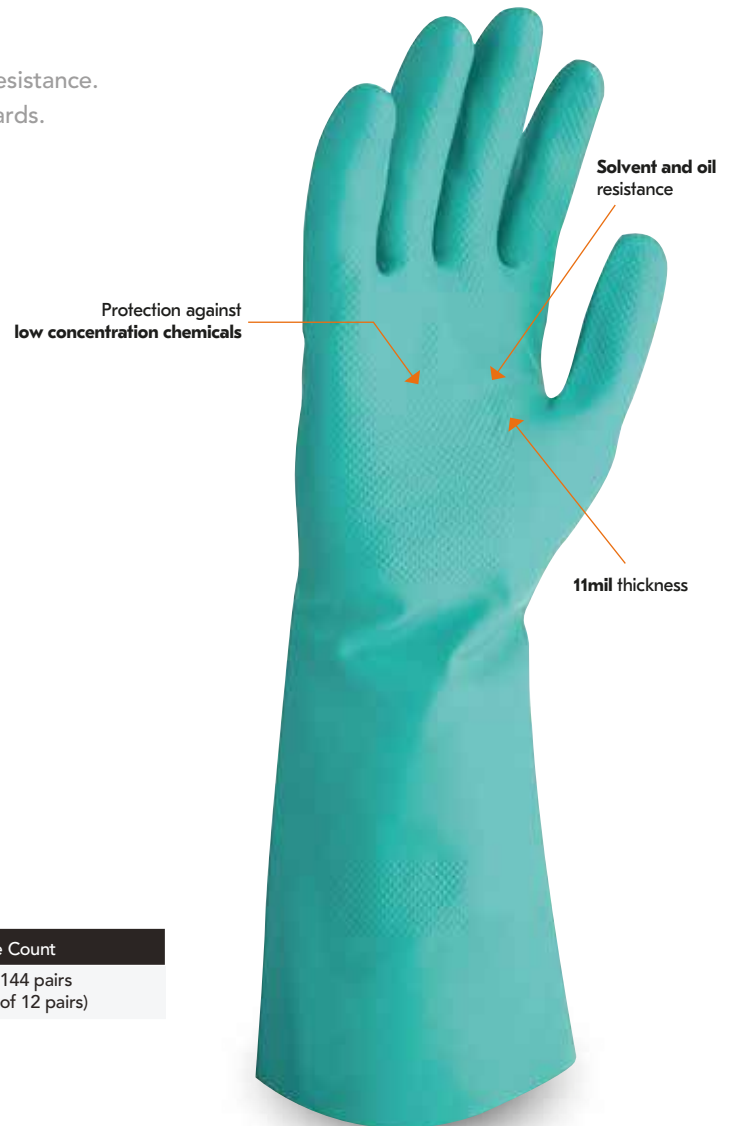

- ▶ Excellent grip and dexterity
- ▶ Enhanced breathability and comfort
- ▶ Improved cost-in-use

### FEATURES:

- KLEENGUARD™ G80 Nitriflex Gloves offer solvent and oil resistance.
- Chemical & Mechanical protection complying with EN standards.
- FDA & European Certification for food contact.
- Material: 97% Nitrile & 3% additives.
- Length: 13 in (330 mm).
- Thickness: 11 mil (0.28 mm).

### TYPICAL USE:

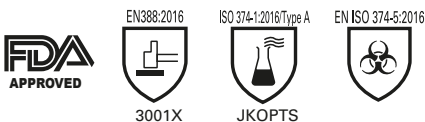

- General cleaning and maintenance of various industrial work environments.
- Cleaning tasks in Contractor companies
- Tasks where there is contact with certain low concentration chemicals (According to G80 Nitriflex Chemical Guide.)
- Tasks in wet processes.
- Processes in the food industry where there is direct contact with food supplies and raw materials where non-disposable gloves with mechanical protection are required.
- Processes in agro-industry with direct contact on fruits, vegetables and other foods.
- Processes in the food industry focused on the shrimp, prawn and chicken business.
